PROJECT

E-commerce web Application - ongoing :

- I'm using HTML5 for overall layout and CSS 3 for styles and effects. For dynamic activities and some specific functions I used javascript to make the website more responsive it's ongoing near a final stage.

My personal Portfolio - ongoing :

- Here I used as same HTML 5 and CSS 3 for overall layouts and feature designs and effects. For specific functional activities I used javascript. And in the contact section the entered data I can get as through google sheets. Its on the hosting stage.
